

Jozef Matas

Product design engineer

hello@jozefmatas.com

jozefmatas.com

Hi! I'm Jozef, a designer who ships and bridges design and engineering. For over a decade I've worked with B2B and AI startups, from tiny early-stage teams to products at scale. These last few years I've been designing products and building them with the team, so they land in production looking and working the way they were meant to. It's the part of the work I enjoy most.

I work remotely from Europe with people all over the world, and on the side I build small ideas of my own. I'm happiest in a small, fast-moving team where taste and craft matter, and where people are kind and respectful to each other.

LONG-TERM ENGAGEMENTS

All as an independent contractor, since 2013.

- | | |
|-------------|--|
| 2026 | <p>Product design engineer at Riverpool
Remote / Israel</p> <p>From scratch to AI-powered analytics in hours: a B2B data layer for corporations, built for the agentic era, AI-native and always current. Brand was not the focus yet; I worked on the product's design engineering and overall polish, shipping real pull requests to production and working with the engineers day to day.</p> |
| 2025 – 2026 | <p>Design partner at Uniti
Remote / USA</p> <p>Uniti is the agentic AI platform for real estate operators: AI agents built for real estate that capture more revenue, respond in seconds and automate customer operations. I was responsible for marketing (the brand itself was an agency's work), including the website built in Framer, for the Series A deck that raised \$12M, and for product design engineering and prototyping.</p> |
| 2024 – 2025 | <p>Senior designer / Design engineer at Remo Health
Remote / USA</p> <p>Remo Health is a virtual clinic for dementia care: neurologists, geriatricians, nurses, pharmacists, social workers and care navigators who diagnose and manage all types of dementia, with everyday support for people living with it and those who care for them. I was responsible for the web platform for dyads, the person with dementia and their carer, and for clinicians, for the overall design system, and for direct pull requests and code contributions.</p> |
| 2024 | <p>Senior product designer at StubHub
Remote / USA</p> <p>For over 20 years StubHub has been the leading marketplace for fans to buy and sell tickets, and with viagogo it now spans more than 200 countries and territories. I was part of the checkout team, redesigning the whole checkout experience.</p> |
| 2023 | <p>Senior product designer at Joy Project
Remote / USA</p> <p>Joy is the only app dedicated to spreading joy in your home city, built on the belief in multiplication, not addition. I designed and prototyped the iOS and web apps.</p> |

2023	<p>Senior product designer at Dogma Remote / USA</p> <p>An open space to discuss, debate and challenge beliefs: a free platform to gain perspective and sharpen your debating skills with real people. I designed and prototyped the iOS app.</p>
2021 – 2022	<p>Founding designer at <u>Weflow</u> Remote / Germany</p> <p>Weflow automates Salesforce data capture with AI and gives sales teams full visibility into deals, pipeline, forecasts and team performance. In its customers' words, it's like Gong with better AI at half the price.</p>
2019 – 2021	<p>Senior product designer at <u>Metalab</u> Remote / Canada</p> <p>For over a decade Metalab has helped everyone from tiny early-stage startups to Fortune 500 companies build products that are simple, beautiful and easy to use. I was part of its Super Sprint team, taking very early-stage teams from an idea to a fully designed product ready for development in six weeks, before AI.</p>
2016 – 2020	<p>Lead designer at <u>Toggl Plan</u> Remote / Estonia</p> <p>Toggl Plan is a project planning tool teams enjoy using every day: plan, prioritise and get projects done on time without overwhelming anyone. I led a small design team of two.</p>
2016 – 2020	<p>Freelance product designer at <u>Toptal</u> Remote</p> <p>Toptal is an exclusive network of the top freelance software developers, designers, finance experts, product managers and project managers in the world.</p>
2013	<p>Product designer at <u>STRV</u> Prague, CZ</p> <p>STRV is a software design and engineering team that brings stunning digital experiences to life.</p>
MY OWN PROJECTS	
2026	<p>Co-founder & design engineer at <u>MediTalk</u> Remote / Slovakia</p> <p>From conversation to report, in seconds. MediTalk turns real clinical conversations into fully structured, evidence-backed documentation.</p>
2026	<p>Co-founder & design engineer at <u>Konex</u> Remote</p> <p>AI that understands your network. You have thousands of LinkedIn connections and use a handful of them. Ask Konex for anyone, whether talent, clients, investors or partners, and it finds the warmest, verified paths through the people you already know, for hiring, selling, deal flow or the next event.</p>
2024	<p>Shareholder & designer at <u>Coridum</u> Remote / UAE</p> <p>A tool for studying the risks in indoor environments, whatever the exposure: particles, gases or radiation, so that when an indoor problem comes up people understand it and can act on it. I helped craft the brand and the online presence, and set the direction for the product's design.</p>

2023 – 2024	Shareholder & design engineer at <u>Fitfolio</u> Remote / USA Fitfolio turns staying fit into rewards: check whether your organisation takes part, connect the wearables you already use, and earn for keeping active, whether you're a student after peak performance, a young family or close to retirement. I was responsible for the visual brand identity and the product itself, and design-engineered the app in React Native with Expo.
2021	Co-founder & designer at <u>Packs</u> Remote / Prague, CZ A platform for DAOs, where web3 teams organise their digital assets and make decisions together. A €500k seed round from <u>Miton</u> was on the table when the market crashed. What stayed was a lot learned about raising, dealing with investors, and building the product itself.
2015	Co-founder & designer at Flويد Remote A tool for prototyping mobile and web app interfaces, built on Framer.js (later Framer Motion), from before Flinto, ProtoPie and their like came along.
2013	Co-founder at BeatBeat Remote A jukebox in your pocket: an app and a system for bars and venues that let guests pick the music. The project that got me into design.

EDUCATION

2009 – 2013	Bachelor's degree in International business & marketing Prague University of Economics and Business Prague, CZ
-------------	---

MY STACK

Code	React, Next.js, TypeScript, Tailwind v4, HTML & CSS
Tools	Claude Code, Cursor and VS Code, all of which I love
Productivity	Grok Bot

BASED IN

Slovakia

LANGUAGES

Slovak (native)
Czech (native)
English (fluent)
German (basic)
